PATENTED ARM WRESTLING MACHINE FOR COMPETITIONS
By equalizing variables, such as the hand grips and arm lengths of the competitors, the patented "World Class Arm Wrestling Machine" is said to eliminate the controversies traditionally found in the sport. In addition, this machine allows left-handed people to compete against right-handed people, as well as in teams of two. The firm is offering manufacturing licensing rights for developing franchise systems. The franchise holder organizes arm wrestling tournaments at local bars, health clubs, and shopping centers, and the license fee includes exclusive rights to a territory or country as well as training in marketing.
